

Sandeep Singh

+91-7078015115 | sandeep.singh.pro8@gmail.com | GitHub | LinkedIn

Software Engineer with experience building backend services, REST APIs, and cloud applications using Python, JavaScript, AWS, Docker, and Kubernetes. Experienced in CI/CD, distributed systems, and scalable production software. Strong analytical and problem-solving skills with a focus on reliable, high-quality systems

Work Experience

Teradata <i>AI Engineer</i>	Jun 2026 – Present <i>Remote</i>
---------------------------------------	--

- Implemented **CI/CD automation for production cloud services**, triggering Docker image builds based on changes to deployment configurations, shell scripts, and **Kubernetes YAML manifests**.
- Implemented **Kubernetes secret management using External Secrets Operator (ESO)**, integrating **AWS Secrets Manager** with Kubernetes and supporting cloud environments including Azure and GCP.
- Contributed to **requirements engineering automation** by building a pipeline that analyzes software requirements and generates relevant requirement-gathering questions, reducing manual discussion effort.
- Built **Grafana dashboards for production monitoring and observability**, visualizing service health, deployment metrics, and operational performance to improve system visibility and troubleshooting.

GE3S <i>Full Stack Developer</i>	Feb 2026 – Jun 2026 <i>Remote</i>
--	---

- Developed a **centralized backend and web platform** using **React, Node.js, Express.js, and MongoDB**, building **RESTful APIs** for multiple organizational workflows.
- Developed **Retrieval-Augmented Generation (RAG) systems** for question answering over sustainability reports, integrating document retrieval with LLM-based responses.
- Implemented **SSO and 2FA** for secure authentication across multiple organizational tools and services.
- Built scalable **RESTful APIs** and integrated third-party services including **OpenAI, Stripe, and email automation** for AI, subscription, and communication workflows.
- Containerized and deployed applications using **Docker and AWS**, supporting production-oriented cloud deployment and infrastructure management.

ZoomInfo <i>Software Engineering Intern</i>	May 2025 – Jul 2025 <i>Remote</i>
---	---

- Developed a **scalable web crawler** to extract product URLs, metadata, and structured content from multiple company websites using keyword-based discovery logic.
- Implemented **data cleaning and preprocessing** to reduce noise, duplicates, and inconsistencies in extracted web data.
- Built an **LLM-based classification pipeline** to identify and label value propositions and pain points from extracted content.
- Designed **RESTful APIs** using Next.js for efficient data serving and integration with downstream workflows.
- Orchestrated **asynchronous workflows** using **Temporal.io**, improving workflow reliability and failure handling.
- Worked with **Python, BeautifulSoup, Selenium, Next.js, Temporal.io**, and LLM APIs.

Skills

Programming Backend: C++, Python, JavaScript, Shell Scripting, Express.js, Next.js, REST APIs, SQL
Cloud, DevOps Distributed Systems: AWS, Docker, Kubernetes, Linux, CI/CD, Git, Grafana, Temporal.io
AI Computer Science: LLM APIs, RAG, MCP, Vector Databases, Data Structures and Algorithms, OS, DBMS, Computer Networks, OOP

Education

Indian Institute of Technology (BHU), Varanasi Bachelor of Technology in Computer Science and Engineering, CGPA: 7.74	2022 – 2026
PT H S R L Indian Public School, Vrindavan, Mathura, UP CBSE Class XII, 93.4%	2022
Shri Balaji Public School, Avairani, Mathura, UP CBSE Class X, 94.4%	2020

Projects

Healthcare Management System <i>MongoDB, React.js, Node.js, Express.js, JWT, Nodemailer</i>	<i>GitHub</i>
---	---------------

- Developed a **MERN-based healthcare management system** with **JWT authentication, role-based access control, RESTful APIs**, appointment booking, and automated email notifications using **Nodemailer**.

Achievements

- JEE Advanced:** Secured a rank within the top 0.5% of all candidates nationwide in 2022.
- LeetCode:** 480+ Problems Solved and 100 Days badge earned, 2026.
- GeeksForGeeks:** 250+ Problems Solved and awarded GFG T-Shirt, 2026.
